Far Eastern USSR Targets

50X1

4. Colonel Macia expressed the view that in the light of the penetration of the air above the United States by the USSR earth satellite we should now press more strongly for permission to penetrate the air above the USSR by AQUATONE although this was admittedly somewhat closer to the earth. In this regard, the Chairman agreed to provide a draft for early consideration in justification of missions from Base C with regard to highest priority targets ANGARSK, UKRAINA, SOVETSKAYA GAVAN, and KOMSOMOLSK.

50X1

JAMES Q. REBER
Chairman
